

## **The Skin Treatments Every Bride Should book pre-wedding at S-Thetics, with Oxygenetix**

**Glowing, radiant, flawless skin that makes a perfect base for make-up is at the top of every bride's wishlist and with S-Thetics this is achievable.**

**S-Thetics** medical aesthetic clinic in Beaconsfield has devised two skin treatments that are perfect for brides, harnessing the rejuvenating properties of processes such as Microneedling and Radiofrequency and aiding post-treatment recovery with the application of the revolutionary **Oxygenetix Oxygenating Foundation**. This provides both supreme, full coverage with added skin benefits due to the Ceravite formula that promotes cell repair and the Aloe Vera base which has anti-inflammatory properties to minimise redness and speed up recovery.

### **Microneedling for Skin Rejuvenation**

This popular face, neck and décolletage treatment involves tiny needles that penetrate the skin, activating processes in cells which also occur after injuries to the skin. This means it's especially good for brides who suffer with acne, pigmentation or have signs of ageing. Unlike some clinics, S-Thetics use EDS, which is electronic microneedling and is more comfortable for the patient than conventional manual dermaroller treatments. Some patients can have redness post-treatment, so **Oxygenetix** is applied as a final step to give complete coverage and aid repair.

### **PURE Skin Resurfacing and Tightening**

This treatment uses the FDA approved Endymed device which harnesses radiofrequency technology to tighten, brighten and smooth skin, making it glow pre-wedding. It benefits areas that are frequently exposed to the sun, such as the face, neck, décolletage and hands or areas susceptible to acne scarring. Immediately after the PURE Skin Resurfacing & Tightening treatment, patients will experience some redness, which can last up to two days. They may also develop micro-crusting, as the skin cells renew and the resurfacing takes place. This can last for three to five days but the effects are easy to disguise with **Oxygenetix Breathable Foundation**.

- Notes to editors -

S-Thetics is a state-of-the-art medical aesthetic clinic located in the heart of Beaconsfield Old Town in Buckinghamshire specialising in advanced non-surgical treatments for the face and body.

Founded by surgeon and cosmetic doctor, Miss Sherina Balaratnam, S-Thetics specialise in the latest scientifically based skin and medical aesthetic treatments and offer a broad range of treatments within their menu – from advanced skincare products and facial treatments, to cosmetic injectables and non-surgical skin rejuvenation using medical grade technology.
